

QuickSetter™ Balancing Valve with Flow Meter

© Copyright 2020 Caleffi

132 Series

Function

The balancing valve accurately controls the flow rate of heating and cooling transfer fluid supplied to fan coils and terminal units; or where flow balancing is required in solar thermal systems. Proper hydronic system balancing ensures the system operates according to design specifications, providing satisfactory thermal comfort with low energy consumption.

The flow meter is housed in a by-pass circuit on the valve body and can be shut off during normal operation. The flow meter permits fast and easy circuit balancing without added differential pressure gages and charts. The balancing valve comes standard with a hot pre-formed insulation shell to optimize thermal performance for both hot and chilled water.

These items are designed for use in closed hydronic systems. Do not use in plumbing applications. These items do not meet the low-lead plumbing standards of U.S. and Canada.

Product range

132 Series Balancing valve with flow meter sizes 1/2", 3/4", 1", 1-1/4", 1-1/2", 2" NPT female and press

Technical specifications

Valve:	Body and ball: Ball control stem: Ball seal seat: Control stem guide: Seals:	brass chrome-plated brass PTFE PSU peroxide-cured EPDM
Flow meter:	Body: Bypass valve stem: Springs: Seals: Flow meter float and indicator cover:	brass chrome-plated brass stainless steel peroxide-cured EPDM PSU
Performance:	Max. percentage of glycol: Max. working pressure: Working temperature range: Flow rate range unit of measurement: Accuracy: Control stem angle of rotation: Required operating wrench:	50% 150 psi (10 bar) 14 - 230°F (-10-110°C) gpm ±10% 90° 1/2"-1 1/4": 9 mm 1 1/2" and 2": 12 mm
	Connections :	1/2"- 2" FNPT; 1/2" - 2" press
Flow rate correction factor:	20% - 30% glycol solutions: 40% - 50% glycol solutions:	0.9 0.8
Insulation shell:	closed cell expanded PE-X, 10 mm thick (see page 7 for specification)	

SAFETY INSTRUCTION / CONSIGNE DE SÉCURITÉ

This safety alert symbol will be used in this manual to draw attention to safety related **instructions**. When used, the safety alert symbol means **ATTENTION! BECOME ALERT! YOUR SAFETY IS INVOLVED!** FAILURE TO FOLLOW THESE INSTRUCTIONS MAY RESULT IN A SAFETY HAZARD.

Ce symbole d'avertissement servira dans ce manuel à attirer l'attention sur la sécurité concernant instructions. Lorsqu'il est utilisé, ce symbole signifie **ATTENTION ! DEVENEZ ALERTE ! VOTRE SÉCURITÉ EST EN JEU ! NE PAS SUIVRE CES INSTRUCTIONS PEUT PROVOQUER UN RISQUE DE SECURITE.**

WARNING: This product can expose you to chemicals including lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

AVERTISSEMENT: Ce produit peut vous exposer à des produits chimiques comme le plomb, qui est connu dans l'État de Californie pour causer le cancer, dommages à la naissance ou autre. Pour plus d'informations rendez-vous www.P65Warnings.ca.gov.

WARNING: Caleffi shall not be liable for damages resulting from stress corrosion, misapplication or misuse of its products.

AVERTISSEMENT: Caleffi ne sera pas responsable des dommages résultant de la corrosion sous tension, d'une mauvaise application ou d'une mauvaise utilisation de ses produits.

CAUTION: All work must be performed by qualified personnel trained in the proper application, installation, and maintenance of systems in accordance with all applicable codes and ordinances.

ATTENTION: Tous les travaux doivent être effectués par du personnel qualifié formé à la bonne application, installation et maintenance des systèmes conformément aux codes et règlements locaux.

CAUTION: If the balancing valve is not installed, commissioned and maintained properly, according to the instructions contained in this manual, it may not operate correctly and may endanger the user.

ATTENTION: Si la vanne d'équilibrage n'est pas installée, mis en service et entretenue correctement, selon les instructions contenues dans ce manuel, il peut ne pas fonctionner correctement et peut mettre en danger l'utilisateur.

CAUTION: Make sure that all the connecting pipework is water tight.

ATTENTION: S'assurer que tous les raccordements sont étanches.

CAUTION: Over-tightening and breakage can occur with the use of Teflon® pipe joint compounds. Teflon® provides lubricity so that care must be exercised not to over-tighten joints. Failure to follow these instructions could result in property damage and/or personal injury.

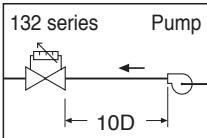

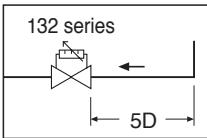

ATTENTION: Un serrage excessif et une rupture peuvent survenir avec l'utilisation de Teflon® composés de joint de tuyau. Le Teflon® offre un pouvoir lubrifiant de sorte que les soins doivent être exercé pour ne pas trop serrer les joints. Non-respect de ces instructions pourrait entraîner des dommages matériels et / ou des blessures corporelles.

WARNING: System fluids are under pressure or temperature can be hazardous. Be sure the pressure has been reduced to zero and the system temperature is below 100°F (38°C). Failure to follow these instructions could result in property damage and/or personal injury.

ATTENTION: Les fluides du système sont sous pression ou la température peut être hasardeux. Assurez vous que la pression a été réduite à zéro et que la température du système est inférieure à 38°C (100° F). Non-respect de ces instructions peuvent entraîner des dommages matériels et / ou des blessures corporelles.

Installation

The balancing valves, with built-in flow meter, must be installed by qualified technical personnel in accordance with the instructions given in this manual and with current regulations.
Clean the pipes of any debris, rust, welding slag and any other contaminants.

As in all piping circuits it is important to pay attention to the cleanliness of the entire system.

For optimal operation, any air in the water must be removed.

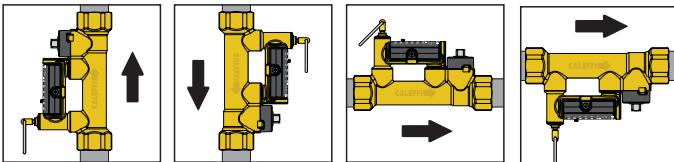

In order to ensure measuring accuracy, the balancing valves with flow meter must be installed by keeping a straight section above them at least as long as five diameters, increased to at least ten diameters if the nearest device upstream is a pump.

Do not install in direct sunlight.

The valves must be installed so that:

- the direction of the flow agrees with that of the arrow on the valve body.
- there is easy access to the flow meter valve, control stem and dial with the calibration adjustment range.

The valves can be fitted on either vertical or horizontal pipes.

Installation Tip

Flow rate adjustment

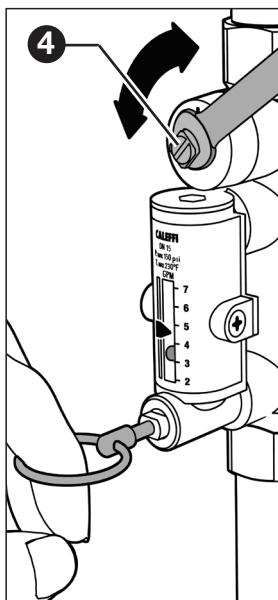

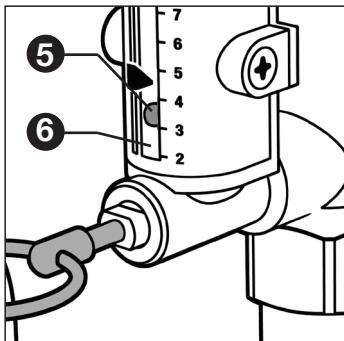

- A. With the aid of the indicator (1), mark the reference flow rate on which the valve is to be set.

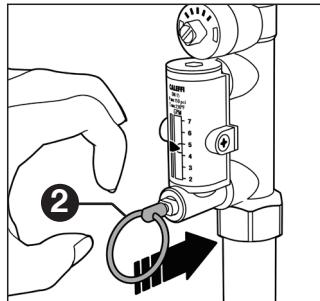

- B. Use the ring (2) to slowly open the flow meter bypass valve that shuts off the flow of medium in the flow meter (3) under normal operating conditions.

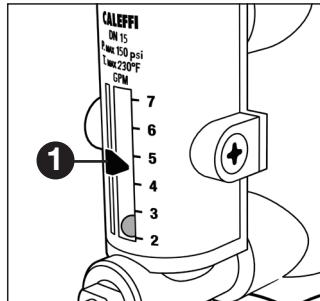

- C. Keeping the flow meter bypass valve open, apply a 9 mm wrench to the balancing valve control stem (4) to slowly adjust the flow rate, which is indicated by a metal ball (5) that runs inside a transparent cylinder (6) alongside which there is a graduated scale in GPM.

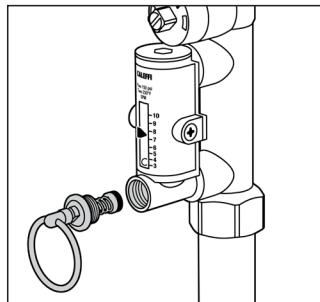

- D. After completing the balancing, release the ring (2) of the flow meter bypass valve, which will automatically go back into the closed position.

- E. On completing the adjustment, the indicator (1) can be used to keep the setting in memory, in case checks need to be made over time.

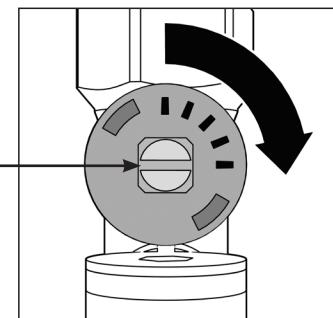

- F. A replacement flow meter bypass valve stem with operating ring is available in the event it is damaged and inoperable. Order code F19346. See page 12 for replacement instructions. In addition, a replacement flow meter assembly is available, see page 7 for order code numbers.

Code	Connection	Flow rate (GPM)	Cv
132436A	1/2" press	1/2 - 1 3/4	1.0
132556A	3/4" press	2.0 - 7.0	6.3
132666A	1" press	3.0 - 10.0	8.3
132776A	1 1/4" press	5.0 - 19.0	15.2
132886A	1 1/2" press	8.0 - 32.0	32.2
132996A	2" press	12.0 - 50.0	53.7

Procedure for installation and insulation assembly

1. Remove the protective strip from the adhesive surface. Re-close the insulation shells.
2. If the balancing valve with flow meter is used with chilled water, spread a thin layer of sealant on the edge of the insulation and wait until the solvent evaporates (10 minutes approx.) and then re-close it.

Insulation technical specification

Material:

Thickness:

Density:

Thermal conductivity (DIN 52612):

closed cell expanded PE-X

10 mm

- inner part: 30 kg/m³

- outer part: 50 kg m³

- at 0°C: 0.038 W/(m·K)

- at 40°C: 0.045 W/(m·K)

Coefficient of resistance to water vapor (DIN 52615):

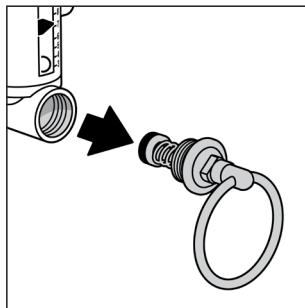

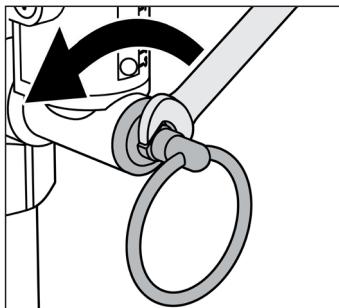

> 1.300 Working temperature range: 32 - 212 F (0–100°C)

Reaction to fire (DIN 4102):

class B2

Procedure for replacing bypass valve stem with operating ring

1. Remove bypass valve assembly with an 8 mm wrench.
2. Install replacement bypass valve assembly, code F19346, using locktight to seal the threads.
