

**Waldorf Widespread Basin Faucet (Tall Spout)** 

US-WF135/US-WF135\_LV

# **Installation Instructions**

### Introduction

The faucets in this range are single flow (hot and cold water mix in the body) and should therefore be supplied with hot and cold water at balanced pressures. If the faucets are not supplied at balanced pressures then the mixer will not function correctly.

The minimum water pressure required for these faucets is 2.9 psi. The maximum water pressure is 87.6 psi, (beyond which pressure reducing valves must be fitted).

The faucets are fitted with quarter-turn ceramic disc cartridges which provide a good flow rate with very smooth movement.

IMPORTANT: Please read these instructions carefully before you begin and retain for future reference. These instructions have been prepared for your guidance, you must exercise due care at all times.

We do not accept responsibility for any problems that may occur through incorrect installation.

#### Installation notes

**NOTES:** The installation must comply with all plumbing codes including local codes and be installed by a licensed plumbing contractor.

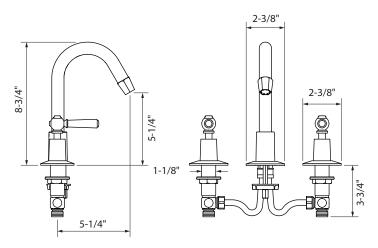

**WARNING!** Before installing a new faucet it is essential that you thoroughly flush through the supply pipes in order to remove any remaining debris, solder or other impurities. Failure to carry out this simple procedure can cause problems or damage to the working of the faucet.

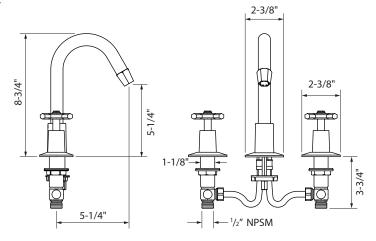

Fitting isolating valves to the inlet feeds is recommended for ease of maintenance.

INSTALLATION: Remember to turn off the main water supply before connecting to any existing pipe work or doing any maintenance.

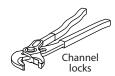

WARNING! Please check for any hidden pipes and cables, electric or otherwise before drilling holes in a wall.

### Dimensions

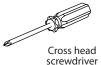

## **Tools required**

# 1 Installation

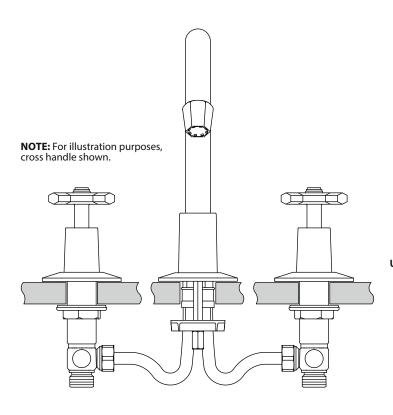

# 2 Parts list

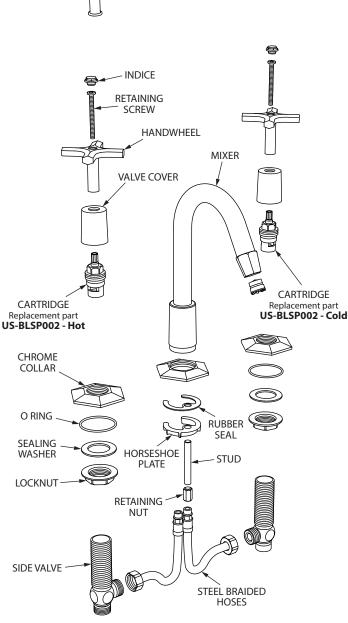

**LEVER** 

- Shut off your water heating system then, with your main water supply turned off, open the lowest hot and cold faucets and allow to drain until supply pipes are empty.
- Identify all components before fitting.
- Use the rubber seal, horseshoe plate and retaining nut provided to install the faucet to the basin as shown below.
- Connect the hot and cold water supplies.

#### ATTENTION; Check all new connections for leaks.

- Turn on the main water supply, close all faucets except for the new installed faucet and as the system refills, check for leaks.
- Once satisfied there are no leaks, switch on the heating system.

## 3 Maintenance

#### Care of your faucet

- Clean surfaces gently with a soft, damp cloth using mild soap
- We DO NOT recommend using any household cleaners as many can cause damage to the finish

**Warranty** - All **Crosswater London** products come with a limited lifetime warranty. For full details, terms and conditions visit our website.
