

MULTI-STAGE FILTRATION SYSTEM

Model # 30101

The Waterstone 30101 Filtration system features a single cartridge multi-stage replaceable filter. The first stage is a 20 micron pre-filter, followed by the second stage 5-micron pre-filter, with a final stage GAC (Granular Activated Carbon) filter.

This unit meets the requirements for NSF 42 & 53. The 30101 system is rated at 1000 gallons providing exceptional filtration capacity and effectively reducing chlorine, VOCs (Volatile Organic Compounds), bad taste and odor from your municipal drinking water.

We have put together a quick and easy reference chart below to help you see just how much of what we can commonly find in our drinking water can be handled by this multi-stage GAC filtration system. This system is effective, economical, and a perfect accessory with your Waterstone Hot & Cold, Hot only, or cold only drinking water faucet.

Acetaldehyde	4	Ethyl Chloride	4	Ozone	4
Acetone	4	Ehtyl Ether	4	PCBs	5
Amines	3	Gasoline	5	Pesticides	5
Amyl Acetate	5	Heavy Metals	3	Phenol	5
Benzene	5	Herbicides	5	Plastic Taste	5
Bleach	5	Hydrogen Peroxide	5	Potassium Permanganate	4
Bytly Alcohol	5	Insecticides	5	Propionaldehyde	3
Butly Acetate	5	Isopropyl Acetate	5	Propyl Acetate	4
Calcium Hypochlorite	5	Ketones	5	Propyl Chloride	4
Chloral	5	Lead	3	Radon	4
Chloramine	4	Mercaptans	4	Rubber Hose Taste	5
Chloroform	5	Methyl Acetate	4	Sodium Hypochlorite	5
Chlorine	5	Methyl Bromide	5	Solvents	4
Clorobenzene	5	Methyl Chloride	4	Sulphonated Oils	4
Chlorophenol	5	Methyl Ethyl Ketone	5	Tar Emulsion	4
Chlorophyll	4	Naphtha	5	Taste from Organics	4
Cresol	5	Nitrobenzene	5	THMs	5
Defoliants	5	Nitrotoluene	5	Toluene	5
Diesel Fuel	5	Odors	5	Toluidine	5
Ethyl Acetate	5	Oil - Dissolved	5	Trichlorethylene	5
Ethyl Acrylate	5	Oil - Suspended	2	Turpentine	5
Ethyl Amine	4	Organic Esters	5	Xylene	5

5 - EXCELLENT - proven effective

3 - GOOD - very acceptable results

1 - POOR - not recommended

4 - VERY GOOD - proven effective

2 - FAIR - limited application
